

super_cat_game

All pins broken out!

It rolls up!

My GitHub

A pressure-sensitive RGB LED mat for making arcade-style games (for a cat, if you'd like!)

With an ESP32 S3 N16R8 devkit, **the cloud's** the limit! (**pun intended**, there's Wi-Fi/Bluetooth)

Uses WS2812B Neopixel LEDs and Velostat film for pressure sensing
